# A Model and Method for Implementing an Embedded Therapy Program

Jaime H. Castillo, PhD, LMHC, NCC Embedded Therapist and Interim Training Director RIT | College of Science June 8<sup>th</sup>, 2021

# **Learning Objectives**

- Use a comprehensive model for implementing an embedded therapy program
- Plan a logic model to identify short, medium, and long term goals of embedded therapy program
- Utilize data organization and tracking tools for assessment and program evaluation
- Explain how to support embedded therapy staff to thrive
- Discuss the challenges and barriers to embedded programming

Mission	<ul><li>Identify key stakeholders</li><li>Define purpose and goals</li></ul>	
Development	<ul> <li>Conduct needs assessments</li> <li>Create logic model</li> <li>Develop Programming</li> </ul>	
Delivery	<ul> <li>Engage in direct clinical services</li> <li>Engage in indirect services</li> </ul>	
Evaluation	<ul> <li>Gather formative and summative data throughout year</li> <li>Complete an annual embedded program evaluation</li> <li>Engage with key stakeholders on programming goals, outcomes, and feedback</li> </ul>	

Mission	<ul> <li>Identify key stakeholders</li> <li>Define purpose and goals</li> </ul>	
Development	<ul> <li>Conduct needs assessments</li> <li>Create logic model</li> <li>Develop Programming</li> </ul>	
Delivery	<ul> <li>Engage in direct clinical services</li> <li>Engage in indirect services</li> </ul>	
Evaluation	<ul> <li>Gather formative and summative data throughout year</li> <li>Complete an annual embedded program evaluation</li> <li>Engage with key stakeholders on programming goals, outcomes, and feedback</li> </ul>	

# **Mission: Identify Key Stakeholders**

Students	Dean and Associate Deans	Academic Advisors
Faculty and	Staff and	Marketing and
Chairs	Leaders	Communications

# **Mission: Define Purpose and Goals**

- Increase (insert academic/service unit) student access to CaPS services
- Embedded Therapist will integrate themselves into the community to:
  - Understand the cultural nuances of the (academic/service unit)
  - Develop corresponding outreach programming for faculty, staff, and students grounded in mental health and wellness needs of the community.

Mission	<ul> <li>Identify key stakeholders</li> <li>Define purpose and goals</li> </ul>	
Development	<ul> <li>Conduct needs assessments</li> <li>Create logic model</li> <li>Develop Programming</li> </ul>	
Delivery	<ul> <li>Engage in direct clinical services</li> <li>Engage in indirect services</li> </ul>	
Evaluation	<ul> <li>Gather formative and summative data throughout year</li> <li>Complete an annual embedded program evaluation</li> <li>Engage with key stakeholders on programming goals, outcomes, and feedback</li> </ul>	

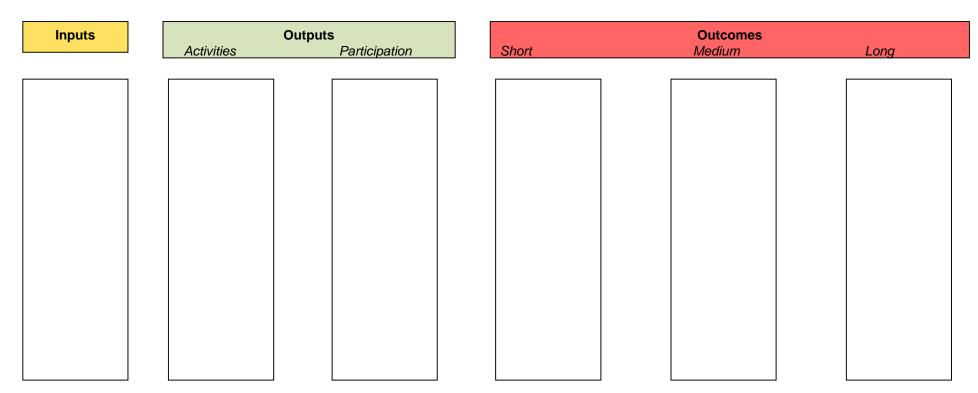

# **Development: Conduct Needs Assessment**

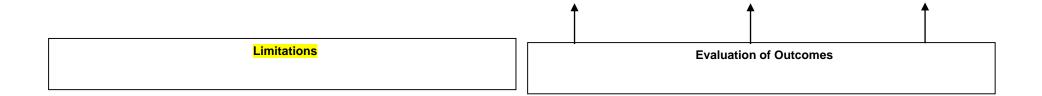

- In the next 1-3 years, what area(s) would you like to grow in as an individual regarding college student mental health?
  - Knowledge (i.e. understanding current trends in college mental health, awareness of mental health symptoms)
  - Practical skills (i.e. making supportive statements, providing reflections of feelings, active listening, referring students to services, knowing how to conclude a meeting that has turned into a therapy session, etc...)
  - Beliefs
  - Other, please specify
- In 1-3 years, what area(s) would you like to see accomplished in (insert academic/service unit) with regards to student mental health?
- In 3-5 years, what area(s) would you like to see accomplished in (insert academic/service unit) with regards to student mental health?

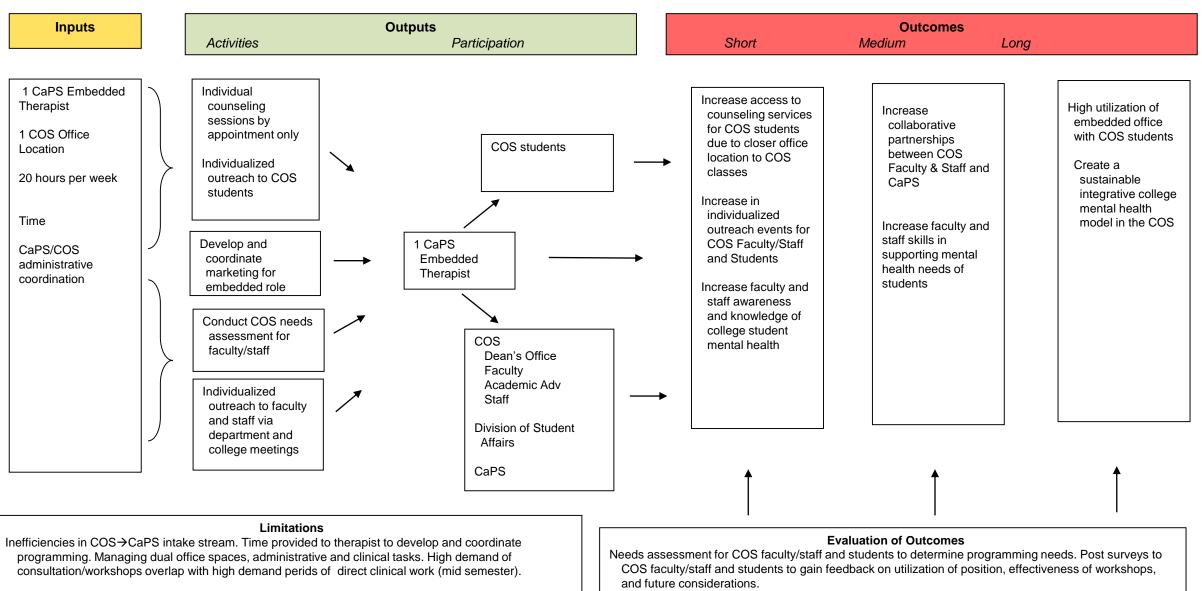

# **Development: Conduct Needs Assessment**

- What style of engagement do you prefer for your own learning?
  - Didactic seminars
  - Conversations/forums on selected topics
  - Interactive workshops/role plays
  - Other, please specify
- As the Embedded Therapist within (academic/service unit), I can best support you by (select all that apply)
  - Providing opportunities for consultation
  - Facilitating seminars on contemporary issues in college student mental health
  - Facilitating interactive workshops
  - Facilitating a presentation/discussion directly to students during a class
  - Other, please specify

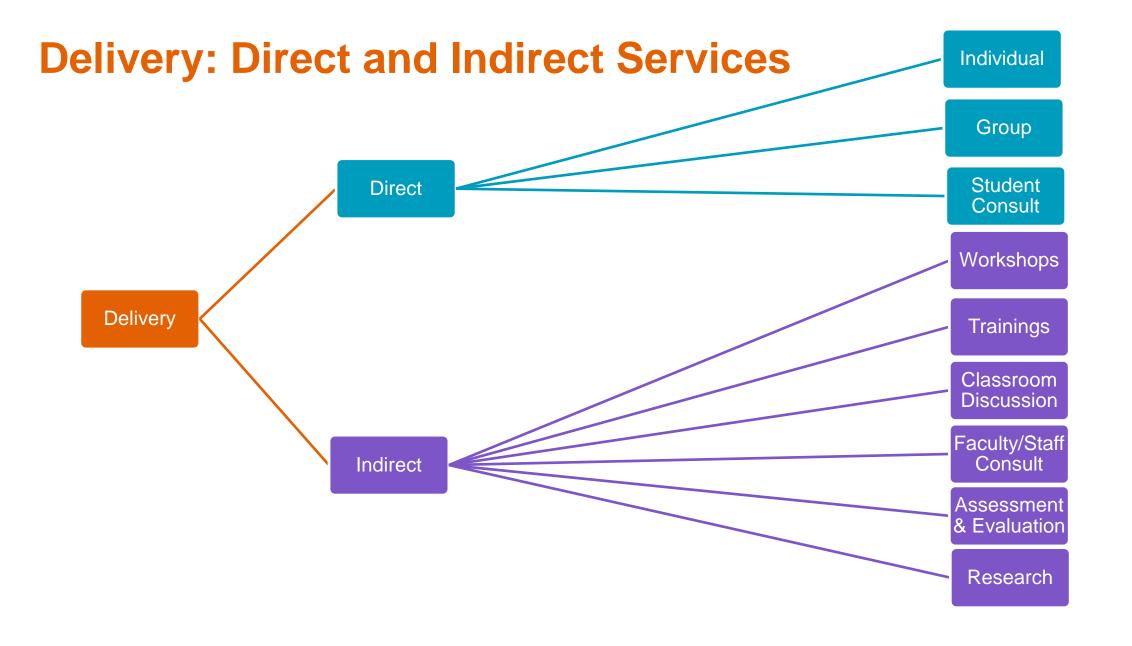

## **Development: Create a Logic Model**

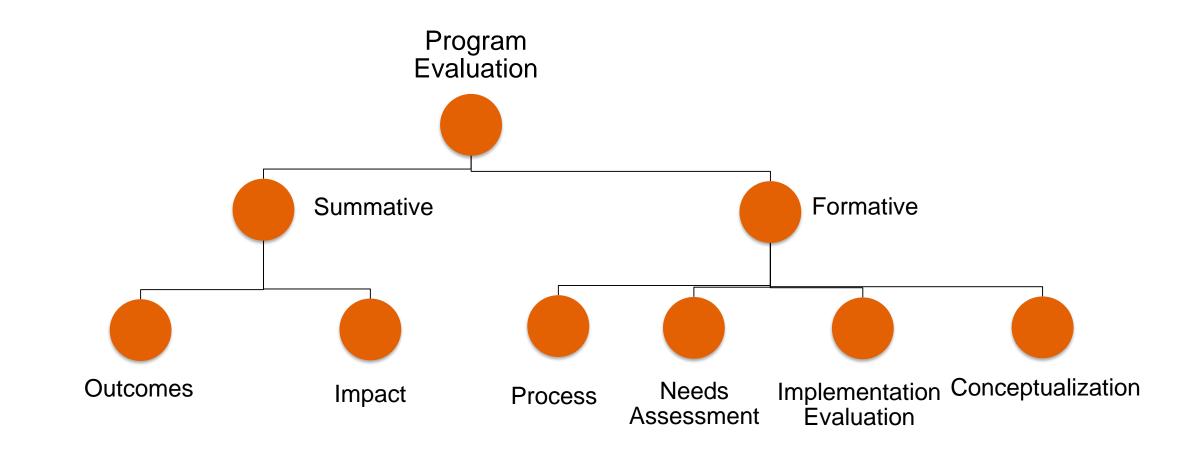

Mission	<ul> <li>Identify key stakeholders</li> <li>Define purpose and goals</li> </ul>	
Development	<ul> <li>Conduct needs assessments</li> <li>Create logic model</li> <li>Develop Programming</li> </ul>	
Delivery	<ul> <li>Engage in direct clinical services</li> <li>Engage in indirect services</li> </ul>	
Evaluation	<ul> <li>Gather formative and summative data throughout year</li> <li>Complete an annual embedded program evaluation</li> <li>Engage with key stakeholders on programming goals, outcomes, and feedback</li> </ul>	

Mission	<ul> <li>Identify key stakeholders</li> <li>Define purpose and goals</li> </ul>
Development	<ul> <li>Conduct needs assessments</li> <li>Create logic model</li> <li>Develop Programming</li> </ul>
Delivery	<ul> <li>Engage in direct clinical services</li> <li>Engage in indirect services</li> </ul>
Evaluation	<ul> <li>Gather formative and summative data throughout year</li> <li>Complete an annual embedded program evaluation</li> <li>Re-engage with key stakeholders on programming goals, outcomes, and feedback</li> </ul>

#### **Evaluation: Gathering Summative and Formative Data**

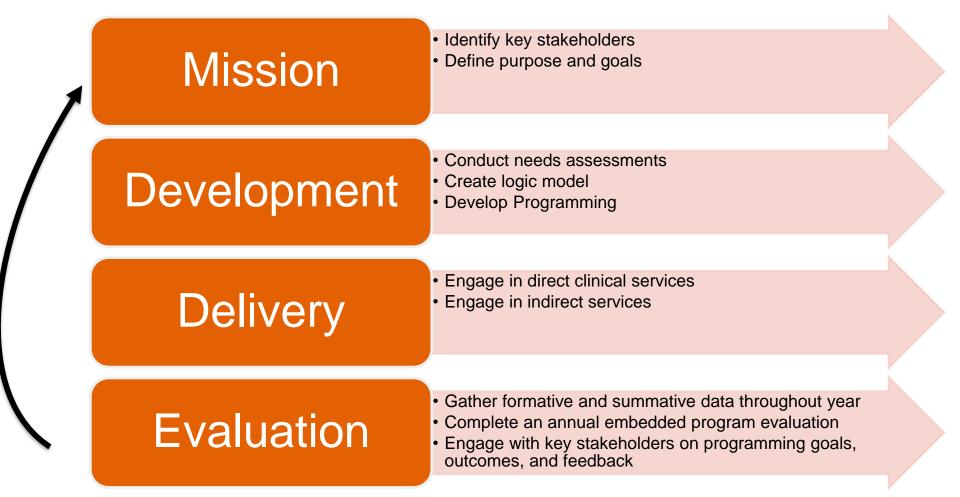

### **Evaluation: Gathering Summative and Formative Data**

#### Tracking Forms

- Embedded Outreach Tracking
- Activities and Programming Calendar

# **Evaluation: Re-engage with Key Stakeholders**

- Review key accomplishments
- Discuss progress towards short, medium, and long term outcomes in Logic Model
- Identify opportunities and barriers
- Identify key and emerging partnerships and collaborations
- Elicit and integrate feedback from key stakeholders
- Develop program plan for next academic year

# **Learning Objectives**

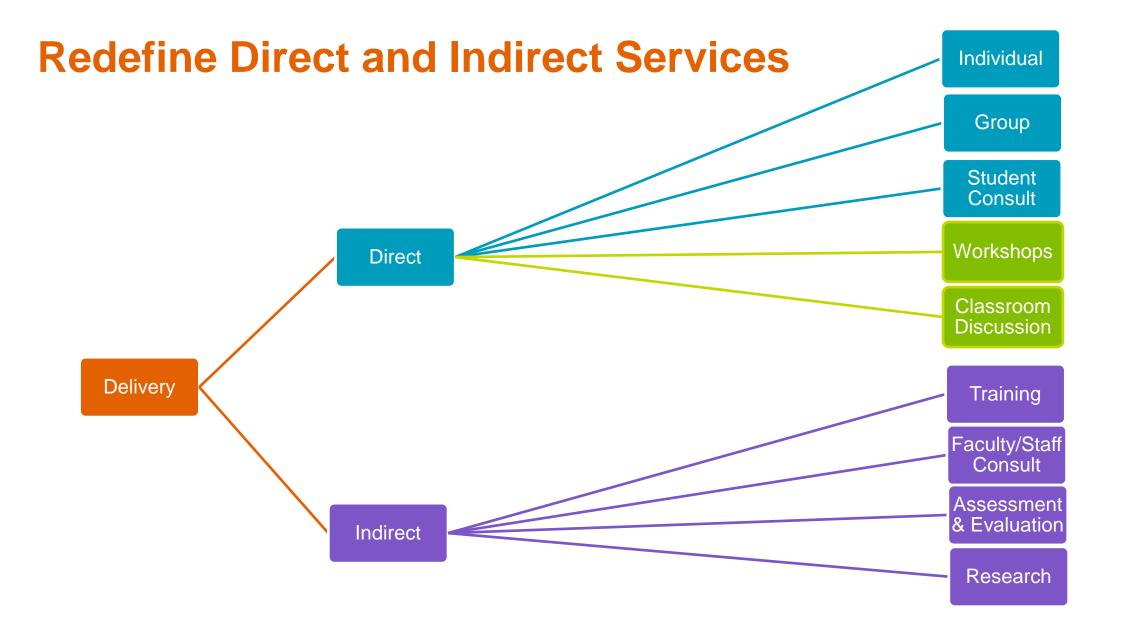

- ✓ Use a comprehensive model for implementing an embedded therapy program
- ✓ Plan a logic model to identify short, medium, and long term goals of embedded therapy program
- ✓ Utilize data organization and tracking tools for assessment and program evaluation
- Explain how to support embedded therapy staff to thrive
- Discuss the challenges and barriers to embedded programming

## **Challenges and Barriers to Embedded Programming**

- Unclear definition of purpose and goals
- Management of multiple roles, expectations, settings, requests, etc...
- Balancing competing demands for clinical time, consultation, programming, etc...across systems
- Coordinating marketing and communication across systems
- Approaching embedded programming as identical to non-embedded counseling center service delivery

# **Supporting Embedded Programs: For Directors**

- Recognize embedded role/programming is unique; therefore, requires different forms of systemic and individual support to thrive than nonembedded clinicians
- Ensure offices are outfitted with necessary equipment, space, and privacy
- Allocate time and scheduling for embedded services and program development
- Redefine direct and indirect clinical services
  - Workshops, trainings, consultations (i.e. level 1 interventions)
  - Clinical caseload distribution

# **Supporting Embedded Programming: For Directors**

#### Nurture campus partnerships

• Take lead on establishing initial partnerships and collaborations

#### Create opportunities for connection across team members

- Recognize isolation and burnout can occur in embedded providers
- Encourage non-embedded staff to be knowledgeable of embedded programming
- Hold monthly embedded staff meetings with center directors

#### Be Flexible

- Protocols, Procedures, Appointment Codes
- Scheduling for attending embedded related events, building partnerships, etc...

#### Encourage creativity

# Supporting Embedded Programming: For Staff

- Protect time and scheduling for embedded services and program development
- Encourage embedded colleagues to meet monthly to support, share resources, and develop programming
- Create systems to organize and track program offerings
- Be assertive in what you need!
- Be creative!

# Creativity, Flexibility, and Advocacy
